

Meeting Agenda

Group: Good People

Date:2019-10-01

Participants: Richard, Anton, Charles, Saga, Lo

Reports from the previous meeting

Richard : Investigated how we are gonna save data, SQL Light was a suggestion, but didn't get it to work. Checked pull requests.

Sidetrack:(

Controllern might not always send data through the repository.
Our GoodDeeds might be a bit weird, because it is a database and a service at the same time. Ask Gerdes next time.

JSON format is a suggestion on how we're gonna save data.

)

Charles: Done with the user story. And pushed it to master. Two other userstories to work with currently. Checking out toast in android studio.

Saga: Worked with the next user story, view request. Also did made it possible to show one request. Checked javaDoc, and fixed some test on a untested class. Wants to put in sceleton code for how to create a request.

Lo:

Created headers and will be fixing some merge conflics, and wrote some user stories about karma points. Shipping on how to save data.

Anton:

Fixed interface for account and implemented it. Tested travis that gerdes sent, it didn't work. And checked out some tests.

Objectives

What we are gonna do until the time is over.

- 1: Get requests out.
- 2: Marketplace, all deeds visible and be able to take a deed.
- 3: Get persistence into the application.

Design model update!!!

Update needed from Anton, and then Charles.

Tester

Saga fixed it.

But we need to coverage more.

Discussion and assignments

Will put some hours in for the assignment a.k.a the Peer Review.

Next meeting

GET FUNCTIONALITY.
