Meeting Agenda

Group: Good People
Date: 20/9-2019
Participants: Richard, Anton, Charles, Saga, Lo

Reports from previous meeting

Gerdes asked for protocols which said more about what people are doing, but we've only had meetings as a group. So the improvement he asked for is coming when we start to implement things.

Objectives

The objective of the meeting is to implement a model/ dry run a model.

Discussion and assignments

We started by doing a package design of the repo we will be making. As a start everyone is on the same computer, as we thought it would be easier if one person pushed up everything needed for the first run on git, and then everyone pull it down.

Userstories, we have divided up the userstories, everyone get one each.

Richard fixes introduction to our RAD.
Saga updates the domain, and design model.

Anton will try to fix TRAVIS CI
