Meeting Agenda

Group: Good People
Date:2019-10-17
Participants: Richard, Anton, Charles, Saga, Lo

Reports from the previous meeting

Richard - Fixed refactoring user stories, wrote his part of the code-review. Looked at pull requests and commented.

Anton - Worked with user stories. Account log out and first iteration of market place. Fixed conflicts, looked through pull requests and wrote his part of peer review and added some missing tests.

Charles - Worked with stories, updated design model, looked through pull requests. Also started to work with peer review.

Saga - Is done with user story about showing requests. Has also worked with pull requests and worked with peer review.

Lo - Wrote peer review and worked with view user story. Has added all class responsibilities and that is now merged with master.

Objectives

1. Discuss peer review
2. Fragment
3. Test private methods
4. Gitinspector

Discussion and assignments

We have three pages of the peer review almost done. We divided the work amongst ourselves. Looked through the peer review and tried to fix so we only have two pages.

Discussion regarding fragment that ended in us not implementing it this time, but keep it in mind til the next goodpeople-application.

Can not test private valtidation-tests in view, unfortunately.

Talk to Alex about gitinspector again.

Next meeting

Everyone should continue work with their user stories, round up the code review and start working with SAD and updating the documentation.
